DETAILED ACTION

Election/Restrictions

The election of species of record is maintained.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 2, 4-9, 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sedlacek et al. '87 or Sedlacek et al. '86 taken with Kline '133 or Kline et al. '863 and Green et al.

The Sedlacek references establish that neuraminidase is well known to be used to treat cancer. The Kline references each show that amounts claimed of the neuraminidase are well known in the art as well as the methods of administration, see Kline references col. 6. Green shows that phenol saline is a well known solution to put compounds in before injecting them.

Applicant argues that the references only teach single dose administration of the enzyme. As stated before, the Sedlacek references are teaching a laboratory

experiment which only performs the experiment in one shot to see the effects of the neuraminidase. A physician prescribing the medication would put multiple doses of the enzyme administration since the treatment of diseases such as cancer has to be very aggressive. One single dose of anything is not going to treat something effectively, especially not something as unpredictable and hard to treat like cancer.
